-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 19 April 2007.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

DETAILED ACTION

Response to Arguments

1. Applicant's arguments with respect to claims 1-4, 12-15, 16, and 27 have been considered but are moot in view of the new ground(s) of rejection.

Drawings

2. The drawings are objected to under 37 CFR 1.83(b) because they are incomplete. 37 CFR 1.83(b) reads as follows:

When the invention consists of an improvement on an old machine the drawing must when possible exhibit, in one or more views, the improved portion itself, disconnected from the old structure, and also in another view, so much only of the old structure as will suffice to show the connection of the invention therewith.

3. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or

Art Unit: 2611

"New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

4. The drawings are objected to because they fail to illustrate a method as described in claims 1-11.

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

6. Claims 1, 3-5, 12, 14-16, and 26 are rejected under 35 U.S.C. 102(e) as being anticipated by Sih et al. (U.S. Pub. No. 2003/0086481).

Claims 1, 12, Sih discloses

- generating interrupts in a transfer of information between a rake receiver and a processor ([0004], Sih discloses transferring information in CDMA processing with RAKE fingers in a multipath environment)
- generating said interrupts comprises generating said interrupts in a transfer of symbols between fingers of said rake receiver and said processor, said interrupts having a rate of generation per unit time independent of a time rate of symbol

boundaries of said symbols ([0047], Sih discloses symbol boundaries are determined by a counter where interrupts are determined in an offline processing by an arbiter).

Claims 3, 14, Sih further discloses generating said interrupts comprises generating said interrupts with a rate asynchronous with respect to the time rate of said symbol boundaries ([0047], Sih discloses symbol boundaries are determined by a counter where interrupts are determined in an offline processing by an arbiter).

Claims 4, 15, Sih further discloses generating said interrupts comprises generating said interrupts with a fixed rate.

Claims 5, 16, Sih further discloses generating said interrupts comprises generating interrupts, wherein said symbol boundaries comprise a constant rate ([0047], Sih discloses symbol boundaries are determined by a counter).

Claim 26, Sih discloses:

- a rake receiver ([0004], Sih discloses transferring information in CDMA processing with RAKE fingers in a multipath environment);
- a processor ([0004], Sih discloses transferring information in CDMA processing with RAKE fingers in a multipath environment);
- apparatus able to generate interrupts in a transfer of information between said rake receiver and said processor ([0004], Sih discloses transferring information in CDMA processing with RAKE fingers in a multipath environment)
- wherein said interrupts are generated in a transfer of symbols between fingers of said rake receiver and said processor, said interrupts having a rate of generation

per unit time independent of a time rate of symbol boundaries of said symbols ([0047], Sih discloses symbol boundaries are determined by a counter where interrupts are determined in an offline processing by an arbiter)

- a code division multiple access (CDMA) communications component ([0004], Sih discloses transferring information in CDMA processing with RAKE fingers in a multipath environment).

Allowable Subject Matter

7. Claims 6-11, 18-25 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

8. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the

shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

9. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Erin M. File whose telephone number is 5712726040. The examiner can normally be reached on M-F 1-9:30PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, David Payne can be reached on 5712723024. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
